

Meaghan O'Brien's Important Birth Information

CHI Number

0105965707

Blood Type

A+

Fear of Needles

- Preferably use butterfly needle (the one with the green tag and the wings, aka the children's needle)

Family History of Brugada Syndrome (Heart Arrhythmia)

- Drugs to **AVOID**

Anesthetics / analgesics

GENERIC NAME	BRAND NAME®	CLINICAL USE	REFERENCES	CLASS
Bupivacaine	e.g. Marcaine® Sensorcaine® -other names-	Anesthetic / analgesic	Phillips 2003 Vernooy 2006 Bramall 2011 De la Coussaye 1992 Berman 1994	IIa
Procaine	e.g. Procaine-Penicillin Novocain® -other names-	Analgesic	Arumugam 2012	IIa
Propofol*	e.g. Diprivan® -other names-	Anesthetic	Inamura 2006 Vernooy 2006 Robinson 2008 Flamee 2020 Saint 1998	IIa

Recommendation class: Class I: convincing evidence/opinion; Class IIa: evidence/opinion less clear; Class IIb: conflicting evidence/opinion; Class III: very little evidence.

* Prolonged propofol infusion has particularly been associated with adverse effects

For more information on anesthetic management of Brugada syndrome patients; a review article has been written by Kloesel & Ackerman. When appropriate precautions (see the emergencies page) are taken (general) anesthesia with propofol can most often be per-
